TENTH EDITION

MACROECONOMICS

N. GREGORY MANKIW

Harvard University

15183

15183

15184

Brief Contents

PART I

Introduction

Chapter 1	The Science of Macroeconomics	1
Chapter 2	The Data of Macroeconomics	17

PART II

Classical Theory: The Economy in the Long Run

Chapter 3	National Income: Where It Comes From and Where It Goes	47
Chapter 4	The Monetary System: What It Is and How It Works	81
Chapter 5	Inflation: Its Causes, Effects, and Social Costs	103
Chapter 6	The Open Economy	135
Chapter 7	Unemployment and the Labor Market	183

PART III

Growth Theory: The Economy in the Very Long Run

Chapter 8	Economic Growth I: Capital Accumulation and Population Growth	211
Chapter 9	Economic Growth II: Technology, Empirics, and Policy	245

PART IV

Business Cycle Theory: The Economy in the Short Run

Chapter 10	Introduction to Economic Fluctuations	281
Chapter 11	Aggregate Demand I: Building the <i>IS-LM</i> Model	311
Chapter 12	Aggregate Demand II: Applying the <i>IS-LM</i> Model	339
Chapter 13	The Open Economy Revisited: The Mundell-Fleming Model and the Exchange-Rate Regime	367
Chapter 14	Aggregate Supply and the Short-Run Tradeoff Between Inflation and Unemployment	411

PART V**Topics in Macroeconomic Theory and Policy**

Chapter 15 A Dynamic Model of Economic Fluctuations

Chapter 16 Alternative Perspectives on Stabilization Policy

Chapter 17 Government Debt and Budget Deficits

Chapter 18 The Financial System: Opportunities and Dangers

Chapter 19 The Microfoundations of Consumption and Investment

Epilogue What We Know, What We Don't

Glossary

Index

Contents

Part I Introduction

Chapter 1 The Science of Macroeconomics

1-1 What Macroeconomists Study 1

CASE STUDY The Historical Performance of the U.S. Economy 2

1-2 How Economists Think 3

Theory as Model Building 7

The Use of Multiple Models 7

FYI Using Functions to Express Relationships Among Variables 12

Prices: Flexible Versus Sticky 12

Microeconomic Thinking and Macroeconomic Models 13

FYI The Early Lives of Macroeconomists 14

1-3 How This Book Proceeds 16

Chapter 2 The Data of Macroeconomics 17

2-1 Measuring the Value of Economic Activity: Gross Domestic Product 19

Income, Expenditure, and the Circular Flow 19

FYI Stocks and Flows 21

Rules for Computing GDP 22

Real GDP Versus Nominal GDP 25

The GDP Deflator 27

Chain-Weighted Measures of Real GDP 28

FYI Two Helpful Hints for Working with Percentage Changes

The Components of Expenditure 29

FYI What Is Investment? 30

CASE STUDY GDP and Its Components 31

Other Measures of Income 32

Seasonal Adjustment 34

2-2 Measuring the Cost of Living: The Consumer Price Index 36

The Price of a Basket of Goods 36

How the CPI Compares to the GDP and PCE Deflators 37

Does the CPI Overstate Inflation? 39

2-3 Measuring Joblessness: The Unemployment Rate

The Household Survey

CASE STUDY Men, Women, and Labor-Force Participation

The Establishment Survey

2-4 Conclusion: From Economic Statistics to Economic Models

Part II Classical Theory: The Economy in the Long Run

Chapter 3 National Income: Where It Comes From and Where It Goes

3-1 What Determines the Total Production of Goods and Services?

The Factors of Production

The Production Function

The Supply of Goods and Services

3-2 How Is National Income Distributed to the Factors of Production?

Factor Prices

The Decisions Facing a Competitive Firm

The Firm's Demand for Factors

The Division of National Income

CASE STUDY The Black Death and Factor Prices

The Cobb-Douglas Production Function

CASE STUDY Labor Productivity as the Key Determinant of Real Wages

FYI The Growing Gap Between Rich and Poor

3-3 What Determines the Demand for Goods and Services?

Consumption

Investment

Government Purchases

FYI The Many Different Interest Rates

3-4 What Brings the Supply and Demand for Goods and Services into Equilibrium?

Equilibrium in the Market for Goods and Services: The Supply and Demand for the Economy's Output

Equilibrium in the Financial Markets: The Supply and Demand for Loanable Funds

Changes in Saving: The Effects of Fiscal Policy

Changes in Investment Demand

3-5 Conclusion

Chapter 4	The Monetary System: What It Is and How It Works	81
4-1	What Is Money?	82
	The Functions of Money	82
	The Types of Money	82
	CASE STUDY Money in a POW Camp	83
	The Development of Fiat Money	84
	CASE STUDY Money and Social Conventions on the Island of Yap	85
	FYI Bitcoin: The Strange Case of a Digital Money	85
	How the Quantity of Money Is Controlled	86
	How the Quantity of Money Is Measured	87
	FYI How Do Credit Cards and Debit Cards Fit into the Monetary System?	88
4-2	The Role of Banks in the Monetary System	89
	100-Percent-Reserve Banking	89
	Fractional-Reserve Banking	90
	Bank Capital, Leverage, and Capital Requirements	92
4-3	How Central Banks Influence the Money Supply	95
	A Model of the Money Supply	95
	The Instruments of Monetary Policy	97
	CASE STUDY Quantitative Easing and the Exploding Monetary Base	99
	Problems in Monetary Control	100
	CASE STUDY Bank Failures and the Money Supply in the 1930s	100
4-4	Conclusion	102
Chapter 5	Inflation: Its Causes, Effects, and Social Costs	103
5-1	The Quantity Theory of Money	105
	Transactions and the Quantity Equation	105
	From Transactions to Income	106
	The Money Demand Function and the Quantity Equation	107
	The Assumption of Constant Velocity	108
	Money, Prices, and Inflation	109
	CASE STUDY Inflation and Money Growth	110
5-2	Seigniorage: The Revenue from Printing Money	113
	CASE STUDY Paying for the American Revolution	113
5-3	Inflation and Interest Rates	115

Two Interest Rates: Real and Nominal	115
The Fisher Effect	115
CASE STUDY Inflation and Nominal Interest Rates	116
Two Real Interest Rates: <i>Ex Ante</i> and <i>Ex Post</i>	117
5-4 The Nominal Interest Rate and the Demand for Money	119
The Cost of Holding Money	119
Future Money and Current Prices	120
5-5 The Social Costs of Inflation	122
The Layman's View and the Classical Response	122
CASE STUDY What Economists and the Public Say About Inflation	122
The Costs of Expected Inflation	123
The Costs of Unexpected Inflation	125
CASE STUDY The Free Silver Movement, the Election of 1896, and the Wizard of Oz	126
One Benefit of Inflation	127
5-6 Hyperinflation	128
The Costs of Hyperinflation	128
The Causes of Hyperinflation	129
CASE STUDY Hyperinflation in Interwar Germany	130
CASE STUDY Hyperinflation in Zimbabwe	132
5-7 Conclusion: The Classical Dichotomy	133
Chapter 6 The Open Economy	135
6-1 The International Flows of Capital and Goods	137
The Role of Net Exports	137
International Capital Flows and the Trade Balance	138
International Flows of Goods and Capital: An Example	140
The Irrelevance of Bilateral Trade Balances	141
6-2 Saving and Investment in a Small Open Economy	143
Capital Mobility and the World Interest Rate	143
Why Assume a Small Open Economy?	144
The Model	145
How Policies Influence the Trade Balance	146
Evaluating Economic Policy	147
CASE STUDY The U.S. Trade Deficit	150
CASE STUDY Why Doesn't Capital Flow to Poor Countries?	152

6-3 Exchange Rates	154
Nominal and Real Exchange Rates	154
The Real Exchange Rate and the Trade Balance	156
The Determinants of the Real Exchange Rate	157
How Policies Influence the Real Exchange Rate	159
The Effects of Trade Policies	161
The Determinants of the Nominal Exchange Rate	163
CASE STUDY Inflation and Nominal Exchange Rates	164
The Special Case of Purchasing-Power Parity	165
CASE STUDY The Big Mac Around the World	167
6-4 Conclusion: The United States as a Large Open Economy	170
Appendix The Large Open Economy	172
Chapter 7 Unemployment and the Labor Market	183
7-1 Job Loss, Job Finding, and the Natural Rate of Unemployment	185
7-2 Job Search and Frictional Unemployment	188
Causes of Frictional Unemployment	188
Public Policy and Frictional Unemployment	189
CASE STUDY Unemployment Insurance and the Rate of Job Finding	190
7-3 Real-Wage Rigidity and Structural Unemployment	191
Minimum-Wage Laws	192
Unions and Collective Bargaining	193
Efficiency Wages	195
CASE STUDY Henry Ford's \$5 Workday	196
7-4 Labor-Market Experience: The United States	197
The Duration of Unemployment	197
CASE STUDY The Increase in U.S. Long-Term Unemployment and the Debate over Unemployment Insurance	198
Variation in the Unemployment Rate Across Demographic Groups	199
Transitions into and out of the Labor Force	200
CASE STUDY The Decline in Labor-Force Participation: 2007 to 2017	201
7-5 Labor-Market Experience: Europe	204
The Rise in European Unemployment	204
Unemployment Variation Within Europe	205
The Rise of European Leisure	206
7-6 Conclusion	209

Part III Growth Theory: The Economy in the Very Long Run

Chapter 8 Economic Growth I: Capital Accumulation and Population Growth

8-1 The Accumulation of Capital

The Supply and Demand for Goods

Growth in the Capital Stock and the Steady State

Approaching the Steady State: A Numerical Example

CASE STUDY The Miracle of Japanese and German Growth

How Saving Affects Growth

8-2 The Golden Rule Level of Capital

Comparing Steady States

Finding the Golden Rule Steady State: A Numerical Example

The Transition to the Golden Rule Steady State

8-3 Population Growth

The Steady State with Population Growth

The Effects of Population Growth

CASE STUDY Investment and Population Growth Around the World

Alternative Perspectives on Population Growth

8-4 Conclusion

Chapter 9 Economic Growth II: Technology, Empirics, and Policy

9-1 Technological Progress in the Solow Model

The Efficiency of Labor

The Steady State with Technological Progress

The Effects of Technological Progress

9-2 From Growth Theory to Growth Empirics

Balanced Growth

Convergence

Factor Accumulation Versus Production Efficiency

CASE STUDY Good Management as a Source of Productivity

9-3 Policies to Promote Growth

Evaluating the Rate of Saving

Changing the Rate of Saving

Allocating the Economy's Investment

CASE STUDY Industrial Policy in Practice

Establishing the Right Institutions	260
CASE STUDY The Colonial Origins of Modern Institutions	261
Supporting a Pro-growth Culture	262
Encouraging Technological Progress	263
CASE STUDY Is Free Trade Good for Economic Growth?	263
9-4 Beyond the Solow Model: Endogenous Growth Theory	265
The Basic Model	265
A Two-Sector Model	267
The Microeconomics of Research and Development	268
The Process of Creative Destruction	269
9-5 Conclusion	271
Appendix Accounting for the Sources of Economic Growth	272
Part IV Business Cycle Theory: The Economy in the Short Run	
Chapter 10 Introduction to Economic Fluctuations	281
10-1 The Facts About the Business Cycle	283
GDP and Its Components	283
Unemployment and Okun's Law	286
Leading Economic Indicators	288
10-2 Time Horizons in Macroeconomics	290
How the Short Run and the Long Run Differ	290
CASE STUDY If You Want to Know Why Firms Have Sticky Prices, Ask Them	291
The Model of Aggregate Supply and Aggregate Demand	293
10-3 Aggregate Demand	295
The Quantity Equation as Aggregate Demand	295
Why the Aggregate Demand Curve Slopes Downward	296
Shifts in the Aggregate Demand Curve	297
10-4 Aggregate Supply	298
The Long Run: The Vertical Aggregate Supply Curve	298
The Short Run: The Horizontal Aggregate Supply Curve	300
From the Short Run to the Long Run	301
CASE STUDY A Monetary Lesson from French History	303
10-5 Stabilization Policy	305
Shocks to Aggregate Demand	305

Shocks to Aggregate Supply	306
CASE STUDY How OPEC Helped Cause Stagflation in the 1970s and Euphoria in the 1980s	308
10-6 Conclusion	310
Chapter 11 Aggregate Demand I: Building the IS-LM Model	311
11-1 The Goods Market and the IS Curve	314
The Keynesian Cross	314
CASE STUDY Cutting Taxes to Stimulate the Economy: The Kennedy and Bush Tax Cuts	322
CASE STUDY Increasing Government Purchases to Stimulate the Economy: The Obama Stimulus	322
CASE STUDY Using Regional Data to Estimate Multipliers	324
The Interest Rate, Investment, and the IS Curve	326
How Fiscal Policy Shifts the IS Curve	328
11-2 The Money Market and the LM Curve	331
The Theory of Liquidity Preference	331
CASE STUDY Does a Monetary Tightening Raise or Lower Interest Rates?	333
Income, Money Demand, and the LM Curve	334
How Monetary Policy Shifts the LM Curve	335
11-3 Conclusion: The Short-Run Equilibrium	337
Chapter 12 Aggregate Demand II: Applying the IS-LM Model	339
12-1 Explaining Fluctuations with the IS-LM Model	341
How Fiscal Policy Shifts the IS Curve and Changes the Short-Run Equilibrium	341
How Monetary Policy Shifts the LM Curve and Changes the Short-Run Equilibrium	343
The Interaction Between Monetary and Fiscal Policy	345
Shocks in the IS-LM Model	347
CASE STUDY The U.S. Recession of 2001	348
What Is the Fed's Policy Instrument—The Money Supply or the Interest Rate?	349
12-2 IS-LM as a Theory of Aggregate Demand	351
From the IS-LM Model to the Aggregate Demand Curve	351
The IS-LM Model in the Short Run and Long Run	354

12-3 The Great Depression	356
The Spending Hypothesis: Shocks to the <i>IS</i> Curve	356
The Money Hypothesis: A Shock to the <i>LM</i> Curve	358
The Money Hypothesis Again: The Effects of Falling Prices	358
Could the Depression Happen Again?	361
CASE STUDY The Financial Crisis and Great Recession of 2008 and 2009	362
The Liquidity Trap (Also Known as the Zero Lower Bound)	364
FYI The Curious Case of Negative Interest Rates	365
12-4 Conclusion	366
Chapter 13 The Open Economy Revisited: The Mundell–Fleming Model and the Exchange-Rate Regime	367
13-1 The Mundell–Fleming Model	369
The Key Assumption: Small Open Economy with Perfect Capital Mobility	369
The Goods Market and the <i>IS</i> * Curve	369
The Money Market and the <i>LM</i> * Curve	372
Putting the Pieces Together	373
13-2 The Small Open Economy Under Floating Exchange Rates	375
Fiscal Policy	377
Monetary Policy	378
Trade Policy	380
13-3 The Small Open Economy Under Fixed Exchange Rates	380
How a Fixed-Exchange-Rate System Works	381
CASE STUDY The International Gold Standard	382
Fiscal Policy	383
Monetary Policy	384
CASE STUDY Devaluation and the Recovery from the Great Depression	385
Trade Policy	386
Policy in the Mundell–Fleming Model: A Summary	387
13-4 Interest Rate Differentials	387
Country Risk and Exchange-Rate Expectations	388
Differentials in the Mundell–Fleming Model	

CASE STUDY International Financial Crisis: Mexico 1994–1995	390
CASE STUDY International Financial Crisis: Asia 1997–1998	391
13-5 Should Exchange Rates Be Floating or Fixed?	393
Pros and Cons of Different Exchange-Rate Systems	393
CASE STUDY The Debate over the Euro	394
Speculative Attacks, Currency Boards, and Dollarization	395
The Impossible Trinity	396
CASE STUDY The Chinese Currency Controversy	397
13-6 From the Short Run to the Long Run: The Mundell–Fleming Model with a Changing Price Level	399
13-7 A Concluding Reminder	402
Appendix A Short-Run Model of the Large Open Economy	403
Chapter 14 Aggregate Supply and the Short-Run Tradeoff Between Inflation and Unemployment	411
14-1 The Basic Theory of Aggregate Supply	413
The Sticky-Price Model	413
An Alternative Theory: The Imperfect-Information Model	416
CASE STUDY International Differences in the Aggregate Supply Curve	417
Implications	418
14-2 Inflation, Unemployment, and the Phillips Curve	421
Deriving the Phillips Curve from the Aggregate Supply Curve	421
FYI The History of the Modern Phillips Curve	423
Adaptive Expectations and Inflation Inertia	424
Two Causes of Rising and Falling Inflation	425
CASE STUDY Inflation and Unemployment in the United States	425
The Short-Run Tradeoff Between Inflation and Unemployment	427
Disinflation and the Sacrifice Ratio	429
FYI How Precise Are Estimates of the Natural Rate of Unemployment?	429
Rational Expectations and the Possibility of Painless Disinflation	430
CASE STUDY The Sacrifice Ratio in Practice	431
Hysteresis and the Challenge to the Natural-Rate Hypothesis	433
14-3 Conclusion	435
Appendix The Mother of All Models	436

Part V Topics in Macroeconomic Theory and Policy

Chapter 15	A Dynamic Model of Economic Fluctuations	441
15-1	Elements of the Model	443
	Output: The Demand for Goods and Services	443
	The Real Interest Rate: The Fisher Equation	444
	Inflation: The Phillips Curve	445
	Expected Inflation: Adaptive Expectations	446
	The Nominal Interest Rate: The Monetary-Policy Rule	447
	CASE STUDY The Taylor Rule	448
15-2	Solving the Model	451
	The Long-Run Equilibrium	452
	The Dynamic Aggregate Supply Curve	453
	The Dynamic Aggregate Demand Curve	454
	The Short-Run Equilibrium	457
15-3	Using the Model	459
	Long-Run Growth	459
	A Shock to Aggregate Supply	460
	A Shock to Aggregate Demand	461
	FYI The Numerical Calibration and Simulation	463
	A Shift in Monetary Policy	466
15-4	Two Applications: Lessons for Monetary Policy	471
	The Tradeoff Between Output Variability and Inflation Variability	471
	CASE STUDY Different Mandates, Different Realities: The Fed Versus the ECB	474
	The Taylor Principle	
	CASE STUDY What Caused the Great Inflation?	477
15-5	Conclusion: Toward DSGE Models	479
Chapter 16	Alternative Perspectives on Stabilization Policy	481
16-1	Should Policy Be Active or Passive?	483
	Lags in the Implementation and Effects of Policies	483
	The Difficult Job of Economic Forecasting	485
	CASE STUDY Mistakes in Forecasting	486
	Ignorance, Expectations, and the Lucas Critique	487
	The Historical Record	488

CASE STUDY Is the Stabilization of the Economy a Figment of the Data?	48
CASE STUDY How Does Policy Uncertainty Affect the Economy?	48
16-2 Should Policy Be Conducted by Rule or Discretion?	49
Distrust of Policymakers and the Political Process	49
The Time Inconsistency of Discretionary Policy	49
CASE STUDY Alexander Hamilton Versus Time Inconsistency	49
Rules for Monetary Policy	49
CASE STUDY Inflation Targeting: Rule or Constrained Discretion?	49
CASE STUDY Central-Bank Independence	49
16-3 Conclusion	50
Appendix Time Inconsistency and the Tradeoff Between Inflation and Unemployment	50
Chapter 17 Government Debt and Budget Deficits	50
17-1 The Size of the Government Debt	50
CASE STUDY The Troubling Long-Term Outlook for Fiscal Policy	51
17-2 Measurement Problems	51
Problem 1: Inflation	52
Problem 2: Capital Assets	53
Problem 3: Uncounted Liabilities	54
Problem 4: The Business Cycle	54
Summing Up	55
17-3 The Traditional View of Government Debt	57
FYI Taxes and Incentives	58
17-4 The Ricardian View of Government Debt	58
The Basic Logic of Ricardian Equivalence	59
Consumers and Future Taxes	60
CASE STUDY George H. W. Bush's Withholding Experiment	62
Making a Choice	64
FYI Ricardo on Ricardian Equivalence	66
17-5 Other Perspectives on Government Debt	66
Balanced Budgets Versus Optimal Fiscal Policy	67
Fiscal Effects on Monetary Policy	68
Debt and the Political Process	69
International Dimensions	70
17-6 Conclusion	70

Chapter 18 The Financial System: Opportunities and Dangers	531
18-1 What Does the Financial System Do?	533
Financing Investment	533
Sharing Risk	534
Dealing with Asymmetric Information	535
Fostering Economic Growth	536
18-2 Financial Crises	538
The Anatomy of a Crisis	538
FYI The Efficient Markets Hypothesis Versus Keynes's Beauty Contest	538
FYI The TED Spread	541
CASE STUDY Who Should Be Blamed for the Financial Crisis of 2008–2009?	544
Policy Responses to a Crisis	545
Policies to Prevent Crises	549
CASE STUDY The European Sovereign Debt Crisis	552
18-3 Conclusion	554
Chapter 19 The Microfoundations of Consumption and Investment	555
19-1 What Determines Consumer Spending?	556
John Maynard Keynes and the Consumption Function	556
Franco Modigliani and the Life-Cycle Hypothesis	560
Milton Friedman and the Permanent-Income Hypothesis	564
CASE STUDY The 1964 Tax Cut and the 1968 Tax Surcharge	566
CASE STUDY The Tax Rebates of 2008	567
Robert Hall and the Random-Walk Hypothesis	568
CASE STUDY Do Predictable Changes in Income Lead to Predictable Changes in Consumption?	569
David Laibson and the Pull of Instant Gratification	570
CASE STUDY How to Get People to Save More	571
The Bottom Line on Consumption	572
19-2 What Determines Investment Spending?	574
The Rental Price of Capital	574
The Cost of Capital	576
The Cost-Benefit Calculus of Investment	578

Taxes and Investment	58
The Stock Market and Tobin's q	58
CASE STUDY The Stock Market as an Economic Indicator	58
Financing Constraints	58
The Bottom Line on Investment	58
19-3 Conclusion: The Key Role of Expectations	58
Epilogue What We Know, What We Don't	587
The Four Most Important Lessons of Macroeconomics	587
Lesson 1: In the long run, a country's capacity to produce goods and services determines the standard of living of its citizens.	588
Lesson 2: In the short run, aggregate demand influences the amount of goods and services that a country produces.	588
Lesson 3: In the long run, the rate of money growth determines the rate of inflation, but it does not affect the rate of unemployment.	590
Lesson 4: In the short run, policymakers who control monetary and fiscal policy face a tradeoff between inflation and unemployment.	590
The Four Most Important Unresolved Questions of Macroeconomics	590
Question 1: How should policymakers try to promote growth in the economy's natural level of output?	590
Question 2: Should policymakers try to stabilize the economy? If so, how?	592
Question 3: How costly is inflation, and how costly is reducing inflation?	593
Question 4: How big a problem are government budget deficits?	594
Conclusion	595
	597
