

•	es for teachers	page 8
Not	es for pupils - how to use this book	9
		10
1	Living things Living and non-living things	10
	Classification	
	Use of an identification key	
2	The plant kingdom	12
	List of plant phyla	
	The animal kingdom	14
3	List of animal phyla	
	List of annual []	
4	Cells	16
	Cell structure	
	Types of cells	
	Comparison of animal and plant cells	
		18
5	Food Why food is needed	
	Types of food	
	Food tests	
	Tool itsis	
6	Photosynthesis	20
	What the word 'photosynthesis' mean	S
	Test for starch	
	Experiments	
-	How plants obtain their food	22
7	Leaf structure	
	Plant needs	
	Transpiration	
Q	uestions A	24
8	How animals obtain their food	26
0	Animal needs	
	Food chains	
	Food webs	
9	A balanced diet	28
	Types of food	
	Energy requirements	
	Composition of foods	

6	The mout Chewing	h and teeth po	igv 10
	Types of a		
	Structure	of touth	
	over one single	ON SENTIN	
1	The hum	an alimentary canal	12
	Swallows	Ng.	34
	Stomach		
	Small inte	ratine	
	Large into	estine	
12	Enzyme	and digestion	
		for enzymes	34
		ristics of enzymes	
	rative or	enzymes	
13	Food ste	orage	36-
	Storage	in man	
	400	organs in plants	
14		on and osmosis	38
		liquids and gases	
	Diffusio		
	Osmosi	s	

Q	uestions I	3	40
		-1	42
1	5 Respir		-
		al respiration	
		ic respiration	
	Anaer	obic respiration	
,	6 Exteri	nal respiration	44
1			
	Comp	osition of air	orms
	Breati	ning in fish, insects and we	, t 1000
	17 Breat	hing in man	46
		ture of thorax	
		ation and exhalation	
	Gase	ous exchange	
	18 Tran	sport in mammals	48
	Carrie	cture and function of bloo	d
	Stru	blood smear	
	Mak	ing a blood smear	
	10 01-	ulation of blood	50
	19 Circ	ulation of con-	
		d vessels	
	Lyn	nphatic system	
	Bloc	od groups	
			52
	20 The	heart	
	Fur	ections of blood	
	Cam	ucture of the heart	
	He	art cycle	
	Blo	od pressure	
		in plants	54
	21 Tr	ansport in plants scular bundles (xylem an	d phloem)
	Va	scular bundles (xyrun	
	Ga	seous exchange	

23 Healthy lungs and heart	hale	Investore of the System	
decreased twent forces overland to the contract of the contrac		fractions givends	
nome causes of heart disease		Functions of the flow and	
SCHOOL COLUMN		Franctions of the fire enderine En	2
Questions C	5.6	36 Plant responses	No.
	2.0		
21 The need for excretion	60	Priototropiam experiments	
Waste substances		Asiania and Asiania	
Methods of excretion in snimsky	,		
Methods of excretion in plants		Questions f	
, and the same of			
24 How animals regulate water	62	87 Morement	
Oumoregulation in fresh water		37 Movement	
Oumoregulation in sea water		Mericanent in microscopic	
Country of accountry		Movement in microscopic organisms Nastic movements in large plants	
25 How plants regulate water	64	N. School	
23 How plants regulate water Turgor and wilting		38 Muscles	
Root hair cells		Voluntary muscles	
Root nair cens		Involuntary muscles	1
as a second of the second		Cardiac muscle	
26 Excretion in man	66	11.2000	
Structure of the kidneys		39 The skeleton	
Function of the kidneys		Freshalm	
The bladder		Exoskeleton and endoskeleton	3
		runctions of the skeleton	
27 The skin and temperature control	ol in	The vertebral column	
mam mals	68		
Structure of the skin		40 Joints	
Functions of the skin		Immovable joints	9
		Pivot and sliding joints	
28 Raw materials	70	Synovial joints	
The carbon cycle	/0	,	
The nitrogen cycle		41 Growth and cells	
rise merogen cycle		Mitosis	100
Owenie au D		Division of labour	
Questions D	72		
** * * * * * * * * * * * * * * * * * * *		Tissues and organs	
29 Irritability	74	41 Part	
Response to stimuli by animals		42 Patterns of growth	102
Response to stimuli by plants		Conditions needed for growth	
		Measurement of growth in individuals	
30 Nerve messages	76	Measurement of growth in a population	
Neurones and nerves			
Reflex actions		Questions F	
			104
31 The central nervous system	70		
C.N.S. of the human	78	43 Reproduction in animals	106
		Asexual reproduction	
Regions of the brain		Sexual reproduction	
22 21		•	
32 The senses of man	80	44 Male reproductive system	108
Senses of the skin		Internal fertilisation	1,000
Sense of smell			
Sense of taste		Human male reproductive system	
3 The ear		45 Female reproductive system	
Outer ear	82	Development of embryo	
Middle ear		Human female reproductive system	
		Menstrual cycle	
Inner ear - hearing and balance			
The area		46 Human pregnancy and birth	12
The eye	84		
Structure of the eye		Development of foetus	
Stereoscopic vision		Birth	
		Twins	

47	Metamorphosis pag	e 114	60		
	Incomplete and complete metamorphosi	s	00	Man and agriculture	142
	in insects			Man as a farmer Pesticides	
	Metamorphosis in amphibians			Fertilisers	
	to sinn in plants	110			
48	Reproduction in plants Asexual reproduction in flowering plan	116	61	Man and industry	
	Asexual reproduction in nowering plants	its		Waste products in the atmosphere	1-64
	Reproduction in non-flowering plants			Waste products in water	
		118			
49	The flower Pollination (wind and insect)	110	62	Conservation	146
	Pollination (Wild and Insect)			Alternative sources of energy	
	parts of the flower			Conservation of raw materials	
	s mation and dispersal	120		Conservation of plant and animal life	
50	Fruit formation and dispersal Fertilisation in flowering plants		63	S-d-1	
	Fertilisation in noveling parties		63	Social animals	148
	Methods of dispersal			Social behaviour in the honey bee	
	Dormancy			Social behaviour in mammals	
	1 cormination	122	Oı	uestions H	150
51	Seeds and germination		Q	destions H	150
	Seed structure		64	Food preservation	153
	Germination		04	Food preservation	152
		124		Why food goes bad	
One	stions G	124		Methods of preservation	
Que		126		A	154
52	Heredity	126	65	8	1.74
34	**iotion			Causes of disease	
	The work of Gregor Mendel			Bacteria	
	The work			Antibiotics	
	a - etics	128			156
53	Genetics Material of inheritance		6		130
	. c inheritance			Care of the skin	
	Single factor inheritance Example and definitions of terms used			Care of the nose and mouth	
	Example and definitions of terms				158
		130	6	7 Parasites	136
54	Evolution			Plant parasites	
	Natural selection			Animal parasites	
	Evidence for evolution			Symbiosis	
		122			
	Ecology	132		68 Experimental biology	160
55	Definitions of environment, habitat,		· ·	Observations and hypotheses	
	adaptations, community, ecosystem			Controlled experiments	
	adaptations, community,			Controlled experime	
	habitat	134		Chiology	162
56	Planning the study of a habitat			69 History of biology	
	Equipment			Miscroscopy (development)	
	pH			Classification (development)	
	Quadrats and transects			Summary of important dates	
					164
57	Ecology of fresh water	136		70 Some famous biologists	10.
57	plantal adaptical properties			William Harvey	
	Physical and chemical properties			William Harry	
	Animals and plants			Louis Pasteur	
		120		Joseph Lister	
58	Ecology of the seashore	138			166
	Tides and zonation			Questions I	
	Problems of seashore life				168
	Animals and plants			Extra reading and book list	
	rammais and plants			Extra reading	170
50		140			-
59	A study of soil	140		Glossary	174
	Types of soil				
	Animals and plants			Index	
				Index
