

Biology Today

A course for first examinations

M. D. Robson

*Head of science, Clapton School,
Hackney, London
Chairman, Biological Sciences Panel,
London Regional Examinations Board*

A. G. Morgan

*Head of Lower School Science,
Hurlingham and Chelsea School,
Fulham, London*

M

Macmillan Education

Contents

Notes for teachers	page 8		
Notes for pupils – how to use this book	9		
1 Living things	10		
Living and non-living things			
Classification			
Use of an identification key			
2 The plant kingdom	12		
List of plant phyla			
3 The animal kingdom	14		
List of animal phyla			
4 Cells	16		
Cell structure			
Types of cells			
Comparison of animal and plant cells			
5 Food	18		
Why food is needed			
Types of food			
Food tests			
6 Photosynthesis	20		
What the word 'photosynthesis' means			
Test for starch			
Experiments			
7 How plants obtain their food	22		
Leaf structure			
Plant needs			
Transpiration			
Questions A	24		
8 How animals obtain their food	26		
Animal needs			
Food chains			
Food webs			
9 A balanced diet	28		
Types of food			
Energy requirements			
Composition of foods			
10 The mouth and teeth	page 30		
Chewing			
Types of teeth			
Structure of teeth			
11 The human alimentary canal	32		
Swallowing			
Stomach			
Small intestine			
Large intestine			
12 Enzymes and digestion	34		
The need for enzymes			
Characteristics of enzymes			
Table of enzymes			
13 Food storage	36		
Storage in man			
Storage organs in plants			
14 Diffusion and osmosis	38		
Solids, liquids and gases			
Diffusion			
Osmosis			
Questions B	40		
15 Respiration	42		
Internal respiration			
Aerobic respiration			
Anaerobic respiration			
16 External respiration	44		
Composition of air			
Breathing in fish, insects and worms			
17 Breathing in man	46		
Structure of thorax			
Inhalation and exhalation			
Gaseous exchange			
18 Transport in mammals	48		
Structure and function of blood			
Making a blood smear			
19 Circulation of blood	50		
Blood vessels			
Lymphatic system			
Blood groups			
20 The heart	52		
Functions of blood			
Structure of the heart			
Heart cycle			
Blood pressure			
21 Transport in plants	54		
Vascular bundles (xylem and phloem)			
Gaseous exchange			

22	Healthy lungs and heart Smoking and lung disease Some causes of heart disease	page 56	35	The endocrine system Growth hormone Function of the thyroid gland in man	page 81
Questions C		58	36	Plant responses Tropisms Phototropism experiments Auxin	86
23	The need for excretion Waste substances Methods of excretion in animals Methods of excretion in plants	60	Questions E		90
24	How animals regulate water Osmoregulation in fresh water Osmoregulation in sea water	62	37	Movement Movement in microscopic organisms Nastic movements in large plants	92
25	How plants regulate water Turgor and wilting Root hair cells	64	38	Muscles Voluntary muscles Involuntary muscles Cardiac muscle	94
26	Excretion in man Structure of the kidneys Function of the kidneys The bladder	66	39	The skeleton Exoskeleton and endoskeleton Functions of the skeleton The vertebral column	96
27	The skin and temperature control in mammals Structure of the skin Functions of the skin	68	40	Joints Immovable joints Pivot and sliding joints Synovial joints	98
28	Raw materials The carbon cycle The nitrogen cycle	70	41	Growth and cells Mitosis Division of labour Tissues and organs	100
Questions D		72	42	Patterns of growth Conditions needed for growth Measurement of growth in individuals Measurement of growth in a population	102
29	Irritability Response to stimuli by animals Response to stimuli by plants	74	Questions F		104
30	Nerve messages Neurones and nerves Reflex actions	76	43	Reproduction in animals Asexual reproduction Sexual reproduction	106
31	The central nervous system C.N.S. of the human Regions of the brain	78	44	Male reproductive system Internal fertilisation Human male reproductive system	108
32	The senses of man Senses of the skin Sense of smell Sense of taste	80	45	Female reproductive system Development of embryo Human female reproductive system Menstrual cycle	110
33	The ear Outer ear Middle ear Inner ear - hearing and balance	82	46	Human pregnancy and birth Development of foetus Birth Twins	112
34	The eye Structure of the eye Stereoscopic vision	84			

47	Metamorphosis	<i>page</i> 114	60	Man and agriculture	<i>page</i> 142
	Incomplete and complete metamorphosis in insects			Man as a farmer	
	Metamorphosis in amphibians			Pesticides	
				Fertilisers	
48	Reproduction in plants	116	61	Man and industry	144
	Asexual reproduction in flowering plants			Waste products in the atmosphere	
	Reproduction in non-flowering plants			Waste products in water	
49	The flower	118	62	Conservation	146
	Pollination (wind and insect)			Alternative sources of energy	
	Parts of the flower			Conservation of raw materials	
				Conservation of plant and animal life	
50	Fruit formation and dispersal	120	63	Social animals	148
	Fertilisation in flowering plants			Social behaviour in the honey bee	
	Methods of dispersal			Social behaviour in mammals	
	Dormancy				
51	Seeds and germination	122		Questions H	150
	Seed structure				
	Germination		64	Food preservation	152
				Why food goes bad	
				Methods of preservation	
	Questions G	124	65	Agents of disease	154
52	Heredity	126		Causes of disease	
	Variation			Bacteria	
	The work of Gregor Mendel			Antibiotics	
53	Genetics	128	66	Personal hygiene	156
	Material of inheritance			Care of the skin	
	Single factor inheritance			Care of the nose and mouth	
	Example and definitions of terms used		67	Parasites	158
54	Evolution	130		Plant parasites	
	Natural selection			Animal parasites	
	Evidence for evolution			Symbiosis	
55	Ecology	132	68	Experimental biology	160
	Definitions of environment, habitat, adaptations, community, ecosystem			Observations and hypotheses	
				Controlled experiments	
56	Planning the study of a habitat	134	69	History of biology	162
	Equipment			Miscroscopy (development)	
	pH			Classification (development)	
	Quadrats and transects			Summary of important dates	
57	Ecology of fresh water	136	70	Some famous biologists	164
	Physical and chemical properties			William Harvey	
	Animals and plants			Louis Pasteur	
				Joseph Lister	
58	Ecology of the seashore	138		Questions I	166
	Tides and zonation				
	Problems of seashore life			Extra reading and book list	168
	Animals and plants				
59	A study of soil	140		Glossary	170
	Types of soil				
	Animals and plants			Index	174
