Textbook of
MEDICAL
PHYSIOLOGY

Eighth Edition

Contents

UNIT I	INTRODUCTION TO PHYSIOLOGY: THE CELL AND GENERAL PHYSIOLOGY	1
CHAPTER 1	Functional Organization of the Human Body and Control of the "Internal Environment"	2
	Cells as the Living Units of the Body	2
	The Extracellular Fluid—The Internal Environment	2
	"Homeostatic" Mechanisms of the Major Functional Systems	3
	Homeostasis	3
	The Extracellular Fluid Transport System—The Circulatory System	3
	Origin of Nutrients in the Extracellular Fluid	4
	Removal of Metabolic End Products	4
	Regulation of Body Functions	4
	Reproduction	5
	The Control Systems of the Body	5
	Examples of Control Mechanisms	5
	Characteristics of Control Systems	6
	Summary—Automaticity of the Body	8
CHAPTER 2	The Cell and Its Function	9
	Organization of the Cell	9
	Physical Structure of the Cell	10
	The Membranous Structures of the Cell	11
	The Cytoplasm and Its Organelles	12
	The Nucleus	15
	Comparison of the Animal Cell With Precellular Forms of Life	16
	Functional Systems of the Cell	16
	Ingestion by the Cell—Endocytosis	16
	Digestion of Foreign Substances in the Cell—Function of the Lysosomes	17
	Synthesis and Formation of Cellular Structures by the Endoplasmic Reticulum and the Golgi Apparatus	18
	Extraction of Energy from Nutrients—Function of the Mitochondria	19
	Ameboid Locomotion of Cells	21
	Cilia and Ciliary Movements	22
		vii

CHAPTER 3	Genetic Control of Protein Synthesis, Cell Function, and Cell Reproduction	24
	The Genes	24
	The Genetic Code	24
	RNA—The Process of Transcription	25
	Messenger RNA—The "Codons"	27
	Transfer RNA—The "Anticodons"	27
	Ribosomal RNA	28
	Formation of Proteins on the Ribosomes—The Process of "Translation"	28
	Synthesis of Other Substances in the Cell	29
	Control of Genetic Function and Biochemical Activity in Cells	30
	Genetic Regulation	30
	Control of Enzyme Activity	31
	Cell Reproduction	31
	Replication of the DNA, The Initial Step in Cell Reproduction	32
	The Chromosomes and Their Replication	33
	Mitosis	33
	Control of Cell Growth and Reproduction	33
	Cell Differentiation	34
	Cancer	34

UNIT II MEMBRANE PHYSIOLOGY, NERVE, AND MUSCLE..... 37

CHAPTER 4 Transport of Ions and Molecules Through the Cell Membrane..... 38

Diffusion	38
Diffusion Through the Cell Membrane	39
Factors That Affect Net Rate of Diffusion	43
Osmosis Across Selectively Permeable Membranes—Net Diffusion of Water	44
Active Transport	46
Active Transport Through Cellular Sheets	49

CHAPTER 5 Membrane Potentials and Action Potentials 51

Basic Physics of Membrane Potentials	51
Membrane Potentials Caused by Diffusion	51
Measuring the Membrane Potential	52
The Cell Membrane as an Electrical Capacitor	53
The Resting Membrane Potential of Nerves	53
Origin of the Normal Resting Membrane Potential	54
The Nerve Action Potential	55
The Voltage-Gated Sodium and Potassium Channels	55
Summary of the Events That Cause the Action Potential	57
Roles of Other Ions During the Action Potential	58
Initiation of the Action Potential	58
Propagation of the Action Potential	59

Re-establishing Sodium and Potassium Ionic Gradients After Action Potentials — Importance of Energy Metabolism.....	60
Plateau in Some Action Potentials.....	60
Rhythmicity of Certain Excitable Tissues — Repetitive Discharge.....	61
Special Aspects of Signal Transmission in Nerve Trunks.....	62
<i>Velocity of Conduction in Nerve Fibers</i>	63
Excitation — The Process of Eliciting the Action Potential.....	63
<i>Inhibition of Excitability — "Stabilizers" and Local Anesthetics</i>	64
Recording Membrane Potentials and Action Potentials.....	64
CHAPTER 6 Contraction of Skeletal Muscle	67
Physiologic Anatomy of Skeletal Muscle.....	67
<i>The Skeletal Muscle Fiber</i>	67
The General Mechanism of Muscle Contraction.....	68
Molecular Mechanism of Muscle Contraction.....	69
<i>Molecular Characteristics of the Contractile Filaments</i> ...	70
<i>Degree of Actin and Myosin Filament Overlap — Effect on Tension Developed by the Contracting Muscle</i>	72
<i>Relation of Velocity of Contraction to Load</i>	73
Energetics of Muscle Contraction.....	74
Characteristics of Whole Muscle Contraction.....	74
<i>Mechanics of Skeletal Muscle Contraction</i>	76
<i>Remolding of Muscle to Match Function</i>	77
<i>Rigor Mortis</i>	78
CHAPTER 7 Excitation of Skeletal Muscle Contraction: Neuromuscular Transmission and Excitation-Contraction Coupling	80
Transmission of Impulses From Nerves to Skeletal Muscle Fibers: The Neuromuscular Junction.....	80
The Muscle Action Potential.....	84
Excitation-Contraction Coupling.....	84
<i>Release of Calcium Ions by the Sarcoplasmic Reticulum</i>	84
CHAPTER 8 Contraction and Excitation of Smooth Muscle	87
Contraction of Smooth Muscle.....	87
<i>Types of Smooth Muscle</i>	87
<i>The Contractile Process in Smooth Muscle</i>	87
<i>Regulation of Contraction by Calcium Ions</i>	90
Neural and Hormonal Control of Smooth Muscle Contraction..	90
<i>Neuromuscular Junctions of Smooth Muscle</i>	91
<i>Membrane Potentials and Action Potentials in Smooth Muscle</i>	91
<i>Smooth Muscle Contraction Without Action Potentials — Effect of Local Tissue Factors and Hormones</i>	93
<i>Source of Calcium Ions That Cause Contractions Both Through the Cell Membrane and From the Sarcoplasmic Reticulum</i>	94

UNIT III
CHAPTER 9

THE HEART

Heart Muscle; The Heart as a Pump	97
Physiology of Cardiac Muscle	98
Physiologic Anatomy of Cardiac Muscle	98
Action Potentials in Cardiac Muscle	98
Contraction of Cardiac Muscle	100
The Cardiac Cycle	101
Systole and Diastole	101
Relationship of the Electrocardiogram to the Cardiac Cycle	102
Function of the Ventricles as Pumps	103
Function of the Valves	104
The Aortic Pressure Curve	104
Relationship of the Heart Sounds to Heart Pumping	104
Work Output of the Heart	104
The Chemical Energy for Cardiac Contraction: Oxygen Utilization by the Heart	105
Regulation of Heart Pumping	106
Intrinsic Regulation of Heart Pumping — The Frank-Starling Mechanism	106
Control of the Heart by the Sympathetic and Parasympathetic Nerves	107
Effect of Heart Rate on Function of the Heart as a Pump ..	108
Assessment of Cardiac Contractility	108
Effect of Potassium and Calcium Ions on Heart Function ..	109
Effect of Temperature on the Heart	109

CHAPTER 10 Rhythmic Excitation of the Heart 111

The Specialized Excitatory and Conductive System of the Heart	111
The Sinus Node	111
Internodal Pathways and Transmission of the Cardiac Impulse Through the Atria	113
The A-V Node and Delay in Impulse Conduction	113
Transmission in the Purkinje System	113
Transmission of the Cardiac Impulse in the Ventricular Muscle	114
Summary of the Spread of the Cardiac Impulse Through the Heart	114
Control of Excitation and Conduction in the Heart	115
The Sinus Node as the Pacemaker of the Heart	115
Role of the Purkinje System in Causing Synchronous Contraction of the Ventricular Muscle	115
Control of Heart Rhythmicity and Conduction by the Sympathetic and Parasympathetic Nerves	116

CHAPTER 11 The Normal Electrocardiogram 118

Characteristics of the Normal Electrocardiogram	118
Depolarization Waves Versus Repolarization Waves	118
Relationship of Atrial and Ventricular Contraction to the Waves of the Electrocardiogram	119
Voltage and Time Calibration of the Electrocardiogram	119
